Wisconsin Knowledge and Concepts Examinations—Criterion-Referenced Test
(WKCE-CRT)

Released Item Book

What are released items?

The items in this book are actual items from the fall 2005 state assessment, the Wisconsin Knowledge and Concepts Examinations—Criterion-Referenced Test (WKCE-CRT). These items will not be used again on the state assessment and may, therefore, be used in Wisconsin for professional development, improving instruction, and student practice. The items in this book illustrate the formats and kinds of items that students will encounter on the WKCE-CRT.

How do I use this book?

Professional Development

Released items are useful as educators engage in conversations about what students are expected to know and be able to do to demonstrate proficiency on the state assessments relative to the state model academic standards. Released items can inform discussions about state and local standards, curriculum, instruction, and assessment.

Improving Instruction

Teachers may use released items in classroom activities that help students understand how to:

- solve problems
- determine which answer choices are correct, which are incorrect, and why
- respond to constructed response items with complete, thoughtful answers
- approach long and/or multi-step tasks
- use good test-taking strategies.

Student Practice

Students may perform better and with less anxiety if they are familiar with the format of the test and with the types of items they will be required to answer. See the accompanying guide for instructions on administering the released item book as a practice test and for the answer key. Note that a student's score on the practice test cannot be converted to a scale score, used to predict performance on the operational WKCE-CRT, or used to make inferences about the student's learning.

1 Look at the number sentence below.

$$6 \times 4 = \square$$

Which of these does not make the number sentence true?

Ⓐ 12×2

Ⓑ $12 + 12$

Ⓒ $24 \div 1$

Ⓓ $24 - 4$

2 Look at the table below.

Population of Fairhill

Year	Number of People
1990	1,495
2000	3,618

Based on the information in the table, what was the change in the number of people living in Fairhill from 1990 to 2000 ?

Ⓐ 2,123

Ⓑ 2,283

Ⓒ 5,113

Ⓓ 5,312

3 Sam completed $\frac{2}{7}$ of a puzzle and Sheree completed $\frac{3}{7}$ of the same puzzle.

What fraction of the entire puzzle did they complete?

Ⓐ $\frac{5}{7}$

Ⓑ $\frac{5}{14}$

Ⓒ $\frac{6}{7}$
